

ENCOM Wireless BB 5.8 Series Discontinuation Letter

Friday, March 2nd, 2018

Dear Customer,

This is a notice to advise that ENCOM's BB 5.8 Series has reached end-of-life (EOL).

This EOL notice is due to new FCC regulations that all wireless manufacturers are required to adhere to. More information can be found at the FCC's website at www.fcc.gov

After March 2nd, 2018, all USA specific radios will not support the channels between 5.250 and 5.720 GHz. This may affect your ability to connect to networks of older radios.

Recommendation: For future deployments, ENCOM recommends the E-LITE 5.8 Series* as an alternative to the BB5.8 Series.

Key Comparison	BB 5.8 Series	E-Lite 5.8 Series
Throughput	Up to 108 Mbps	Up to 300 Mbps
Ethernet Link	10/100	10/100/1000
On-board GPS	No	Optional

*NOTE: The E-Lite Series is not a direct replacement for the BB 5.8 Series as these two product lines will not communicate directly with each other over the air.

Please contact ENCOM Wireless for further questions.
